Russell Labs Network Licensed Software

Russell Labs faculty, staff and students can access the following software through campus license agreements:

- ESRI Arc/GIS
- ERDAS Imagine
- ENVI
- MatLab
- SigmaPlot

License Server

These software packages require you to connect to a license server after or during installation.

Our license server at Russell Labs is dmv.russell.wisc.edu.

Installation Software

The installation software is located on dmv in the "software" share.

You need a Russell Labs account to login and access files on the server.

This is most easily done with a computer in the building on a wired connection. For other situations, you will need to run WiscVPN.

On Windows, click Start, and type this in the box below All Programs:
//dmv/software

You can also browse to the server dmv and the software folder through Windows Explorer.

Versions

We attempt to have the latest stable versions of the software available on dmv. If you would like a different version loaded, please contact us to discuss it further.

Notes for Specific Software

- **ESRI** - during installation, ESRI will prompt you for the license options.
  Enter dmv as the network license server.
  For more information about using the Arc/GIS desktop administrator, please see
  http://resources.esri.com/help/9.3/arcgisdesktop/installGuides/ArcGIS_Desktop/The_Administrator.htm

- **ERDAS Imagine** - Point to dmv using the license.dat or .lic file.
  If you don't have a network license file, contact help@russell.wisc.edu.

- **ENVI** - Point to dmv using the license.dat or .lic file.
  If you don't have a network license file, contact help@russell.wisc.edu.

- **Matlab** - There are two options for MatLab:

  - *Townsend lab users*:
    - installation software is available on //dmv/software
    - the license.lic file needs to point to dmv
    - if you don't have a license file, you will need to contact help@russell.wisc.edu to get one

  - *All other users* - CALS offers a college wide license for MatLab.
    Visit this webpage for software, installation instructions and more:
    http://it.cals.wisc.edu/software/available.html

- **SigmaPlot** - CALS offers a college wide license for SigmaPlot.
  Visit this webpage for software, installation instructions and more:
  http://it.cals.wisc.edu/software/available.html
