

# How to Map a Drive to Your Home Folder on the Russell Fileserver from a Mac

11/17/2011

Applies to: Russell Labs faculty, staff, and grad students

Operating Systems: Mac 10.5, 10.6 and Lion

## Are you OFF-campus

**OR**

### Using a Wireless Connection? Do these steps first:

- A. Connect to the Internet.
- B. Launch WiscVPN software,\* then follow the rest of these instructions.

\* for instructions on getting and installing WiscVPN software, visit this webpage: <http://www.doit.wisc.edu/network/vpn/>

1. Press the  key and the “k” key together. The Connect to Server box appears.
2. Click in the server address bar.

Enter the folder information based on the table below. Replace userid with your Russell login id.\*

If your department is...	Type this in the Folder box...
Ento	smb://144.92.199.16/russell/ento/home/userid
Plant Path	smb://144.92.199.16/russell/ppath/home/userid
FWE	smb://144.92.199.16/russell/fwe/home/userid
Hub	smb://144.92.199.16/russell/hub/home/userid

\* Not sure what your Russell login id is? Contact the Russell Labs Help Desk at: [help@russell.wisc.edu](mailto:help@russell.wisc.edu)

Optional:

Tip: Do you want to access your network share drives from this computer in the future? If yes, click Add to Favorite Servers. The server address appears in the box. Click to select it.

3. Click Connect. The Connect to Server box closes. A login box appears:
4. Click to select Registered user.
5. Enter your username and password.
6. Click Connect.
7. You should now be able to access your home folder on the Russell fileserver.

Tip: You can create a shortcut on your sidebar by:

- Click to select the resource (e.g. folder) you want to create a shortcut to.
- From the top menu, choose File..Add to Sidebar (**press the  key and the “t” key together**).
