

WordPress - How to Setup JetPack

8/16/2013

1. Log into WordPress.
2. On the Dashboard menu, click JetPack:

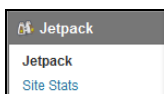

3. The screen changes:

4. Click the blue Connect to WordPress.com button. Sign up for a WordPress account, using an email address that your lab group will be able to read.
5. Check the email for that account, and activate the WordPress account.
6. Go back to the WordPress Dashboard. Click JetPack again.
7. The screen changes again to the screen in step 3 above. Click Connect to WordPress.com, but this time login using the account you created.

Once you successfully connect to WordPress.com with your new login, each feature of JetPack will be turned on.

It may take about 24 hours to start logging visits to your website. To see the stats, on the Dashboard click JetPack and the menu item expands:

8. Click Site Stats. The screen changes to show your site stats:
